

Welcome to VRCScore

VRCScore is a community review and rating platform for VRChat-related profiles and interactions. The goal is to help people share honest, useful, good-faith experiences, not to harass, target, shame, threaten, expose, or organize attacks against anyone.

Before posting, you agree that:

You will only submit truthful, good-faith reviews based on your own experience.

You will not use VRCScore to bully, dox, stalk, threaten, impersonate, defame, sexually harass, or encourage others to target another person.

You will not post private information, including real names, addresses, phone numbers, workplace details, private social accounts, Discord IDs not already public, private screenshots, private messages, or any information that could be used to identify or locate someone outside of VRChat.

You understand that ratings and reviews are user-generated content. VRCScore does not verify every claim before it appears, and a review being visible does not mean VRCScore agrees with it.

You understand that VRCScore may remove content, limit accounts, or ban users when content appears abusive, malicious, false, spammy, illegal, or against the purpose of the site.

Use the site like you are talking about a real person, because you are.
